

# ICSOC 2007

International Conference  
on Service Oriented Computing  
Vienna, Austria  
September 17-20, 2007

## ICSOC 2007

### INTERNATIONAL CONFERENCE ON SERVICE ORIENTED COMPUTING

#### CALL FOR PARTICIPATION!

ICSOC, the flagship conference in the field of service-oriented computing, again provides an outstanding program covering a range of important and innovative topics, including Service Modeling, Service Assembly, Service Management, Quality of Service, Grid Services, Business and Economical Aspects of Services, and more. The conference features three deep dive areas: Information as Service, SOA Governance, and SOA registry and Runtime. There will be state-of-the-art talks by leading authorities, followed by a panel and technical sessions in each of these areas on three days. Leading Authors from academia and industry will present state-of-the-art developments, experiences and best practice in service-oriented computing.

A full day of innovative Workshops is offered Monday, September 17, 2007, five instructive tutorials, panels and first class keynote speakers relish the technical paper sessions.

Visit [www.icsoc.org](http://www.icsoc.org) for more information!
